

Rainbow Street Public School

Major Capital Works Update – May 2016

The Rainbow Street Public School upgrade project is nearing the end of scheme design. The endorsed design will provide 35 new classrooms, 5 refurbished classrooms (in the original school building), new library and special purpose rooms, refurbished staff amenities (in the original school building), new toilets and an increase in the size of the school hall. The ground floor play space will include landscaped areas for passive play and outdoor learning, two new multi-purpose sport courts and new handball play spaces. All demountables on the site will be removed as part of the project.

New classrooms will be based on future focussed learning models with collaborative and flexible learning spaces. There is also a strong emphasis on creating outdoor learning environments to provide students with a diverse range of teaching spaces, making the new school a fun and exciting place to be. Accessibility has also played a strong role in the design process with two lifts and covered walkways providing access to all parts of the school.

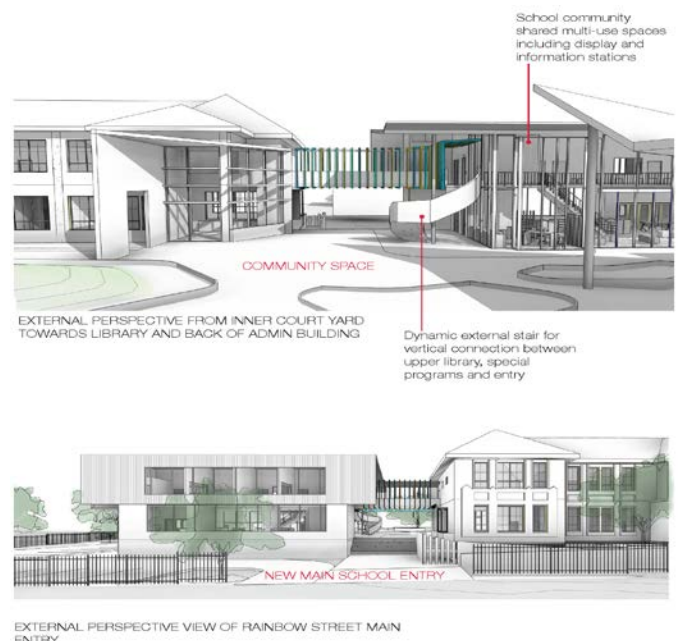

We are currently preparing for the Development Application (DA) to Randwick Council. At the same time the design team is progressing with Detailed Design for the elements that have been finalised as part of the scheme design process.

Upcoming tasks

- Completion of Schematic Design by 2nd week in May 2016
- Development Application to Randwick Council by late May 2016

Master Plan

New School Entrance Perspective
